NyloBlue

Animus[®] Catgut

Veterinary Suture Specialists

Chromic catgut – absorbable sterile surgical suture composed of connective tissue.

INDICATIONS

Chromic gut suture is indicated for the use in animals in general soft tissue approximation and/or ligation, including use in ophthalmic surgery.

CONTRAINDICATIONS

Not for use in cardiovascular or neurological surgery.

- Purity of collagen for optimal tensile strength and in vivo performance.
- Surface smoothness to facilitate knot run down and knot strength.
- Absorption rate is variable at 14 – 28 days.
- Catgut should be stored sealed until ready for use.
- The product should be stored at room temperature in a dry environment.

Animus®

NyloBlue

Nylomide – non-absorbable braided sterile surgical suture.

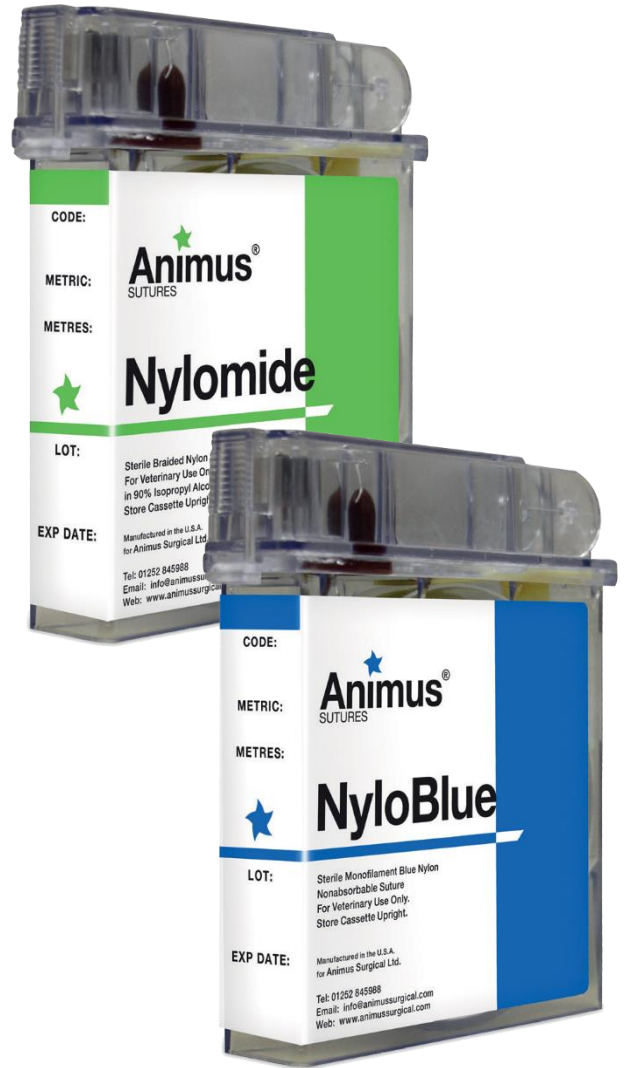

NyloBlue – non-absorbable monofilament sterile surgical suture.

INDICATIONS

Nylon sutures are indicated for use in general soft tissue approximation and/or ligation, including use in cardiovascular, ophthalmic and neurological surgery.

CONTRAINDICATIONS

Due to the gradual loss of tensile strength that may occur over prolonged periods of in vivo, nylon sutures should not be used where permanent retention of tensile strength is required.

- Nylomide / NyloBlue should be stored sealed until ready for use.
- The product should be stored at room temperature in a dry environment.

Animus[®] Monoline[®]

Veterinary Suture Specialists

Polydioxanone (PDO) – monofilament absorbable sterile surgical suture.

INDICATIONS

PDO sutures are intended for use in animals in soft tissue approximation and/or ligation, including use in paediatric cardiovascular and ophthalmic surgery.

CONTRAINDICATIONS

Not for use in adult cardiovascular, microsurgery or neurological surgery.

- Monoline has an extended retention of tensile strength together with a reliable absorption rate of 180 days.
- Monoline has superb handling with exceptional suppleness and excellent knot security.

75%	tensile strength at	14 DAYS
66%	tensile strength at	28 DAYS
53%	tensile strength at	42 DAYS

- Monoline should be stored in its sealed foil pouch until ready for use.
- The product should then be used within 60 days and stored at room temperature in a dry environment.

Animus[®] Violine[®]

Veterinary Suture Specialists

Polyglycolic acid (PGA) – braided absorbable sterile surgical suture.

INDICATIONS

PGA sutures are intended for use in animals in soft tissue approximation and/or ligation, including use in ophthalmic surgery.

CONTRAINDICATIONS

Not for use in cardiovascular or neurological surgery.

- Violine has an excellent tensile strength and holds throughout the critical wound healing period together with a reliable absorption rate of 60 – 90 days.
- Violine has superb handling with exceptional suppleness and knot security.
- Violine + has the added assurance of antibacterial protection.

83%	tensile strength after	14 DAYS
52%	tensile strength after	21 DAYS
20%	tensile strength after	28 DAYS

- Violine should be stored in its sealed foil pouch until ready for use.
- The product should then be used within 90 days and stored at room temperature in a dry environment.

www.animussurgical.com

Membra is a long-lasting, transparent bandage replacement made of a specially formulated, non-toxic, biodegradable hydrogel which dries to form a water-tight dressing.

It is designed for the protection of open wounds and to strengthen surgical incisions.

Membra can be used across a range of species (including aquatic animals) and one application lasts up to 14 days.

Hydrogels, such as PEG (Polyethylene glycol) offer advantages compared to other wound dressings:

- hydration of the wound bed – promote healing and autolytic debridement of necrotic tissue.
- cooling of the wound surface – soothe and are a good choice to protect skin affected by burning.
- transparent – healing can be monitored without the need for dressing changes.
- non-toxic and non-irritant – won't encourage licking or chewing of affected areas.

When applied to a dry wound, **Membra** dries in a few minutes to form a water- resistant seal.

- Ideal for animals that live outside, in water or are exposed to the elements.
- In most cases there is no need for bandaging - saving time, cost and owner inconvenience.

Membra promotes healing:

- Allows oxygen through to the wound surface.
- Blocks external contaminants.
- Maintains the ideal moisture levels for healing.

Membra is durable, flexible and biodegrades naturally.

- Lasts up to 14 days.
- Can be used on hard-to-bandage areas.
- Allows the animal to move and return to normal function.
- Doesn't require removal.

In a wide range of species

- All small mammals.
- Equine and livestock species.
- Avian species.
- Exotics and reptiles e.g. snakes, lizards, frogs.
- Aquatic and marine species including fish, sea turtles, whales and seals.
- Zoo Animals.

For a wide range of lesions

- ✓ For added protection on top of sutures lines.
 - Orthopaedic procedures.
 - Reconstructive surgery.
 - Lump / tumour removal.
 - Amputations.
- ✓ To reduce / eliminate bandaging for open wounds.
 - Trauma/Emergency wounds.
 - Degloving injuries.
 - Following large mass removal.
- ✓ Lacerations / scrapes / cuts / abrasions.
- ✓ Burns.
- ✓ Lick granulomas.
- ✓ Paw pad cuts and tears.
- ✓ Ideal for hard-to-bandage locations.

Animus Code : AS0102 – Price - £69 excl VAT

ANIMUS MEDBOND SKIN GLUE
Cyanoacrylate Skin Adhesive
A quick, painless solution that helps prevent infection

DESCRIPTION:

Cyanoacrylate Skin Adhesive

FEATURES:

- Enables precise placement of adhesive.
- Adhesive stops minor bleeding.
- Acts as a barrier to help keep foreign matter from entering the wound.
- May eliminate need for bandages in some cases.
- Saves time and money for minor procedures.

INDICATIONS

Animus Medbond Skin Glue liquid adhesive bandage is intended for surgical incisions, lacerations, pad wounds and bleeding nails.

Never apply ANY type of adhesive IN a wound.

Intended application is at the edges of the area to be treated. Do not apply Animus Medbond Skin Glue to the eyes. Do not use on infected areas, or wounds that are draining. Never use on animal bites. Do not use on mucosal surfaces (eg, oral cavity, lips).

COLOR(S)

Violet

PACKAGING

Included in each pack: 1 Animus Medbond Skin Glue bottle and 12 non-clogging applicators.

FOR VETERINARY USE ONLY

Animus Code : AG0102 Price £13.02 excl VAT
